# 1. PA03: Control Record

This co-ordinate the different stages of payroll accounting. For each Payroll Area we have to create Control Record. The Importance of Control Record is as follows:

1. Locks the master and time data so changes cannot be made during the payroll process.

2. Lock is valid for payroll past and present.

**User Manual Document** 

Process Name - HCM\_PAYROLL HUMAN CAPITAL MANAGEMENT

3. Changes can be done for payroll future only.

# 2. Payroll Process

# **Checking the Control Record Status:**

**User Manual Document** 

Process Name - HCM\_PAYROLL HUMAN CAPITAL MANAGEMENT

Before running the actual payroll run first we have to check whether the Payroll Results are exited for the previous period, otherwise we cannot run the Payroll for the current period. In order to check this, follow the steps below for the previous period.

Then the following screen will come. Click on change.

C	Control record	<u>E</u> dit	<u>G</u> oto	System	<u>H</u> elp

In the Control Record if the payroll period is previous period and the Status of the Control Record is Release Payroll then we have to Exit the payroll for the previous month otherwise we cannot run the payroll for the current period. To Exit the Payroll click on Exit Payroll button and Save.

After Saving the Control Record, again click on Change for the Control Record and Click on Released for Payroll. Then the Payroll Period will be changed to next period i.e. the current period which we have to Run and Save.

Payroll control	record
& 🖉 🗋 📅	
Payroll area	

The Overall Processes of Control Record for Payroll are exhibited below:

# 3. Checklist for Payroll:

- 1) Check that the payroll for all employees has been carried out accurately for the current month in the Control Record before **E**xiting the Control Record.
- 2) Ensure that there is no need to change in Cost Centre.

If there is any changes in Employee Master like Employee Details, Basic Pay we have to change in PA30 accordingly

**User Manual Document** 

Process Name - HCM\_PAYROLL HUMAN CAPITAL MANAGEMENT

# 4. Payroll Accounting

Payroll Process will be done in 2 phases.

- 1) Simulation Run
- 2) Actual Payroll Run

# **Simulation Run:**

Payroll Simulation is used to evaluate individual employee payroll results. Also, we will perform a Simulation of the entire payroll before producing actual Payroll Results. This gives us the ability to calculate all information for each employee exactly as they would be calculated during a Productive Payroll Run, without actually updating balances. These test results can be reviewed, and adjustments can be made easily prior to starting the actual run.

A simulation run corresponds to a regular payroll run with the following restrictions:

- The results of a simulated payroll run are not saved on the database. We can view and print the results in the payroll log.
- The system does not lock any master data.
- The current payroll period in the payroll control record is not changed.
- The steps *Release payroll* and *Exit payroll* does not apply.

We can run the simulation run by using PC00\_M40\_CALC\_SIMU Transaction code

The screen to enter a payroll simulation looks exactly like the front screen of an actual run. The following screen appears:

Delete the payroll results of those employees with errors and change the master data.

Hence to delete the payroll results of an employee GO TO PU03 => Enter Employee Number => Click On Execute => Select the Payroll Period which we want to delete and click on Delete Button in Menu Bar. Then the Payroll Results will be deleted for that Particular Period.

a. After changing the Master Data, change the Status of the Control Record into Release for Payroll.

**User Manual Document** 

Process Name - HCM\_PAYROLL HUMAN CAPITAL MANAGEMENT

b. Run the Simulation Run and after that if the payroll result is correct then run the actual Payroll for those employees.

3,000.00

Here we can see payment to be transfer to bank.

1) After running Actual Payroll for all Employees generate Pay Slips, Bank Transfer Report, Statutory Reports etc., and get Finance Approval before Dispatching Pay Slips and Bank Transfer so that errors, if any were rectified.

#### **Payroll Log:**

Cash Allowance

The payroll results are displayed in a tree structure. This makes it easier to analyse and get an overview of the payroll results. The log includes a table of contents which is presented as tree structure. The nodes within the tree structure enable to access the required information.

10. After successfully running the actual payroll for all employees exit payroll. Before exiting the payroll, check whether all the details of the payroll is correct as we cannot make any changes in the payroll results after exiting and posting to Finance.

# **5. Posting to Finance (FI):**

### **Create Posting Run**

This can be executed in 'Simulation' or 'Update' Mode. In this step, the system checks for validity of G/L accounts mapping. First simulate a posting run after completing payroll enabling to recognize posting-relevant errors in the payroll results early on, and avoid errors when creating a live posting run. Once simulation run is successful, then run in update mode.

#### **Process Posting Run**

In this step we have controls to 'Release' and 'Post' the documents to FI. These posted documents can be viewed in FI using the transaction code FB03

The payroll results will be posted as per posting dates defined in the payroll posting calendars. For ex: payroll results of monthly salaried employees will be posted to FI on a monthly basis etc.

#### Step a)

The T-code for FI Posting is **PC00\_M40\_CIPE** or by using the navigation path: Human Resource -> Payroll -> International -> Subsequent Activities -> Per Payroll Period -> Evaluation -> Posting to Accounting -> PC00\_M40\_CIPE - Execute run.

# Check Payroll Result [PC00\_M40\_PA03\_CHECK]:

By choosing Check Payroll Result, changes cannot be made to payroll data both for the present or past. This function also locks the concerned payroll accounting area, preventing from including it in the payroll run.

**User Manual Document** 

Process Name - HCM\_PAYROLL HUMAN CAPITAL MANAGEMENT

# Corrections [PC00\_M40\_PA03\_CORR]:

When choosing release for corrections, the Infotype records assigned to selected payroll area for corrections will be released. Choose this function, if Infotype data needs to be changed because personnel numbers were rejected during the payroll run. After collecting thedata release the payroll again. This results in locking the personnel again. Choose start payroll to run payroll again for the personnel numbers for which master data was changed.

# Exit Payroll [PC00\_M40\_PA03\_EXIT PAYROLL]:

By choosing this function it enables to release master data so that they can be maintained for past & present. Do not choose this function until the payroll has run successfully for all the personnel numbers assigned to the selected payroll accounting area.

After successfully running the actual payroll for all employees exit payroll. Before exiting the payroll, check whether all the details of the payroll is correct as we cannot make any changes in the payroll results after exiting and posting to Finance.

# 6. Retro Triggers

Retrotriggers due to promotion / Increment process w.e.f past date w.r.t payroll data
